## About

Software Engineer with 3+ years experience building scalable IAM microservices and enterprise identity solutions at Zoho, improving performance by 80% via Redis and distributed systems. Skilled in Java, Python, C++, REST APIs, RBAC, and cloud platforms (GCP/AWS). Hands-on with ML (TensorFlow, Keras). Passionate about designing robust, distributed software at global scale.

## Work Experience

**Zoho** 06/2023 – present  
Member Technical Staff  
Chennai, India

- Developed scalable IAM backend services in Java using microservices like ZQueue and Hypermem (Redis-based caching), improving performance by 80%. Integrated with distributed file systems (DFS) to ensure reliability and data access at scale.
- Implemented RBAC and secure provisioning for 10,000+ enterprise users, reducing unauthorized access incidents by 95%.
- Designed modular RESTful APIs for maintainable and scalable backend systems.
- Collaborated with cross-functional teams to deliver production-ready infrastructure components, Reviewed team members' code to maintain code quality and adherence to best practices.

**Zoho** 08/2022 – 05/2023  
Project Trainee  
Chennai, India

Enhanced full-stack features for the ManageEngine M365 Manager Plus product, specializing in Microsoft 365 and Exchange Online management and reporting. Developed these features using Ember.js on the frontend and Java with Zoho's custom framework on the backend.

**Zoho** 04/2022 – 06/2022  
Developer Intern  
Chennai, India

Migrated CLI app to Tomcat with SQL + OTP-based authentication.

## Technical Skills

- **Languages:** Java, Python, C++, JavaScript
- **Backend/Frameworks:** Spring Boot, Django REST, Microservices, REST APIs, OAuth2, JWT
- **Frontend & UI:** React, Vite, Tailwind CSS, React Router DOM, HTML, CSS, JavaScript, Ember.js
- **Databases:** PostgreSQL, MongoDB, Redis, DFS
- **Cloud/DevOps:** Docker, Kubernetes, GCP/AWS basics
- **Other:** Algorithms & Data Structures, ML (TensorFlow, Keras), Agile

## Projects

**Voluntra - A NGO Management Platform** 08/2025 – Present

- Architected and deployed a decoupled REST API using Django and PostgreSQL to power a multi-role platform (NGO, Volunteer, Corporate).
- Engineered Role-Based Access Control (RBAC) in DRF ViewSets, implementing complex query filtering to ensure strict data isolation across all three user types.
- Established a full-stack JWT Authentication system (Djoser + Simple JWT) and integrated Axios interceptors on the React/Vite client for secure, token-based session management.

**Deep Learning Based Brain Tumor Stratification App** 01/2023 – 03/2023

- Developed a CNN-based Android app to classify MRI brain scans into 4 tumor types.
- Achieved 92% accuracy with TensorFlow/Keras using optimized CNN architecture.
- Deployed via TensorFlow Lite for real-time, on-device predictions.
- Built a user-friendly UI, reducing manual diagnosis time.

## Education

**Sri Sai Ram Engineering College** 06/2019 – 04/2023  
B.E-Instrumentation and Control Engineering  
CGPA: 9.28 | Department Rank Holder  
Chennai, India

## Achievements

**IEEE Robotics and Automation Society Chairperson:** 03/2021 – 03/2023  
Led 50+ members, organized 5 events with 200+ participants, secured \$500 grant

**IEEEExtreme 15.0** 10/2021  
Team Leader, IEEEExtreme 15.0 - achieved national rank 408 in 24-hour coding contest.
