About

Developer with 2+ years of experience developing scalable, secure microservices and enterprise identity solutions. Skilled in designing RESTful APIs, implementing RBAC, and optimizing performance using Redis-based caching and distributed file systems. Experienced in building reliable backend systems with a focus on maintainability, performance, and production readiness. Adept at collaborating with cross-functional teams to deliver impactful engineering solutions.

Work Experience

Zoho 06/2023 – present
Member Technical Staff Chennai, India

- Developed scalable IAM backend services in Java using microservices like ZQueue and Hypermem (Redis-based caching), improving performance by 80%. Integrated with distributed file systems (DFS) to ensure reliability and data access at scale.
- Implemented role-based access control (RBAC) and secure provisioning/deprovisioning for enterprise identity systems.
- Designed modular RESTful APIs for maintainable and scalable backend systems.
- Collaborated with cross-functional teams to deliver production-ready infrastructure components, Reviewed team members' code to maintain code quality and adherence to best practices.

Zoho 08/2022 – 05/2023
Project Trainee Chennai, India

Built full-stack features for managing Microsoft 365 and Exchange Server using Ember.js and Zoho's custom framework.

Zoho 04/2022 – 06/2022
Developer Intern Chennai, India

Migrated a CLI Todo application to Apache Tomcat with SQL integration, implementing custom user authentication with OTP verification via email and SMS using external services.

Labved Technologies 09/2020 – 03/2021
Full Stack Web Developer Intern Chennai, India

Developed UI forms and designed schemas using MongoDB for NoSQL database integration as part of a full-stack web development project.

Projects

Mobile Application For Brain Tumor Stratification 01/2023 – 03/2023

Built and deployed a CNN-based Android app that classifies MRI scans into tumor categories (pituitary, glioma, meningioma, none).

Brain Tumor Prediction using DL	03/2022 – 05/2022
Developed a neural network to detect presence of brain tumors from MRI scan images.	
Home Automation using IoT	02/2020 – 03/2021
Built a microcontroller-based smart home model for college project expo.	

Education

Sri Sai Ram Engineering College	06/2019 – 04/2023
<i>B.E-Instrumentation and Control Engineering</i>	Chennai, India
CGPA: 9.28 Department Rank Holder	
Kola Saraswathi Vaishnav Senior Secondary School	06/2018 – 06/2019
<i>Higher Secondary Education (12th)</i>	Chennai, India
Grade: 78.4%	
Agarwal Vidhyalaya Matriculation Higher Secondary School	06/2016 – 06/2017
<i>Secondary School Education (10th)</i>	Chennai, India
Grade: 80.4%	

Technical Skills

Programming Technologies	Databases	Web & Frameworks
Java, C, Python	SQL, MongoDB	HTML, CSS, JS, Ember.js, REST APIs
Machine Learning	Tools & Platforms	
OpenCV, Keras	GitHub, Apache Tomcat, Android Studio, IntelliJ, VS Code	

Courses

Neural Networks and Deep Learning	08/2021 – 08/2021
<i>Coursera</i>	Chennai, India
Learned to build and train deep neural networks, and apply deep learning to various applications.	
Python For Everybody-Specialization	04/2020 – 05/2020
<i>Coursera</i>	Chennai, India
Covered data structures, web data access, using databases with Python, and visualizing data.	

Achievements

IEEE Robotics and Automation Society Chairperson:	03/2021 – 03/2023
Led the student branch chapter, built a website, organized 5 events, and secured a \$500 grant to conduct additional student activities.	
IEEEXtreme 15.0	10/2021
<i>Indian Rank - 408</i>	
Served as the Team Leader in the IEEEXtreme 15.0 which is a 24-hour competition and achieved a national rank of 408.
